DYNASTY GARAGE DOORS

COLORBOND® ROLLER DOORS

Our roller doors combine a unique profile with first class materials making them some of the strongest, quietest and most reliable doors available.

Superior, Unique Profile

The exclusive roller door curtain has a unique roll formed profile that is engineer-designed for superior strength, whilst maintaining a unique modern appearance sure to enhance the exterior of your home.

Quality Drums and Springs

All roller doors revolve on precision-made nylon drum wheels; the latest in door technology. Doors are counter-balanced using helical springs to ensure perfect balance and operation. All our springs are heat treated and tempered to give years of trouble free operation.

Dual-Sided Nylon Webbing

We apply nylon-fibre webbing to both sides of the door curtain eliminating metal-on-metal contact resulting in an extremely quiet and smooth operating door for years to come.

Aluminium Bottom Rail

An engineer-designed, heavy-duty extruded aluminium bottom rail is used to strengthen the bottom panel of the door. The bottom rail also incorporates a specially designed weather seal, extruded from tough and durable PVC to protect your garage from the harsh elements.
